9 Essential Skills for the Love and Logic Classroom®: PK-12
Instructor: Ashley Watters

While learning from the curriculum 9 Essential Skills for the Love and Logic Classroom® by Jim Fay and Charles Fay Ph.D. You will learn about effective classroom management techniques and how to build positive relationships with challenging students. This class will help you start the year by motivating students, reducing drama in your classroom, and helping students learn to take responsibility for solving the problems they face.

Academic Make and Take x 4 – Language Arts, Math, Science and Social Studies: PK-4
Instructor: Ashley Watters

Be ready to have the time and supplies to make and take items to use in your own classroom in the areas of language arts, math, science and social studies. The supplies will be available with lots of patterns and ideas to share. These items will help you in meeting state and national standards and your own classroom objectives.

A.C.E. Student Success with Relationships and Read Alouds: PK-5
Instructor: Joy Osborne

Using Great Expectations practices to achieve student success through relationships and read alouds. Structures in this class will focus on meeting the needs of all students in the classroom through read alouds, games, room transformations, interactive notebooks, growth mindset, technology, community involvement, analyzing data, interventions, centers, and incorporating music. We will discuss various types of students that are identified in the classroom such as gifted, struggling academically, or suffer from adverse experiences at home, and how to support their needs in a respectful environment that is conducive to learning at all levels.

Discipline! Mastering Best Practices: PK-12
Instructors: Susan Early

Investigate ways to set the ideal tone in your classroom through “Positive Discipline,” learn how the brain influences behavior, and examine classroom management strategies. This session will also give you an expanded understanding of the Seven Keys to Discipline, teaching methods based on Kohlberg’s levels of intrinsic motivation, and techniques for dealing with the hard-to-reach student. We will focus on teaching from the heart and being proactive with discipline techniques that stop misbehaviors before they become a problem. Come and develop ideas to put into your class the first day of school to make sure your classroom has a WIN/WIN atmosphere! Areas of Focus: Classroom Management, Differentiated Instruction, and Critical Thinking Skills.
Engaging the Brain for Learner Success: PK-12
Instructors: Susan Early

Participate in the eight most important ways to transition students’ brains for different kinds of learning. Eric Jensen’s techniques for managing students’ states will be explored and practiced so you will be ready to take these tools back to your classroom and implement them immediately. Manage students’ emotional states and thereby achieve success in meeting your teaching objectives. Areas of Focus: Classroom Management and All Subject Areas.

First Eight Days: 1-6
Instructor: Chelsea Blackburn

Start your school year off RIGHT with The First 8 Days. Come ready to get reenergized for the new school year and learn strategies to implement into the first two weeks of school that will revolutionize the way your classroom operates. Establish climate early, new ways to review rules and procedures, teambuilders, the GE Practice Implementation plan and more are in store!

Games + Fun = Learning: K-12
Instructor: Trish Waller

Do you have the TESTING BLUES? Don’t let the pressure of testing ruin your LOVE of teaching. Learn how to make and use a variety of games to enhance the learning in your GREAT EXPECTATIONS classroom. Activities include Bingo, Tic Tac Toe, Jeopardy, and more! Adapt these activities to fit any subject at any level. Your students will be having so much fun they won’t even realize they are learning. Participants are encouraged to bring their GREAT EXPECTATIONS Methodology Handbook to class. Areas of Focus: Critical Thinking, Differentiated Instruction, and Make & Take.

Methodology 2: PK-12
Instructor: Various

This class offers a fresh look at all 17 practices and how to “put the puzzle together” in deeper implementation. The class will include more structures to easily implement into your instruction to improve not only your implementation of GE, but also enhance your overall instruction.
Methodology 3: PK-12
Instructor: Various

An energetic and inspirational advanced course for educators who have previously attended both GE Methodology I and II. A one-day course, this class provides GE educators with a plethora of new structures, ideas, and activities to incorporate immediately in the classroom/building. It is a time to Review and Revisit the 17 practices as well as Reconnect with colleagues and Rejuvenate your passion for both teaching and learning.

More Games + Fun = Learning: 3-12
Instructor: Trish Waller

Are you and your students feeling the stress of TESTING? This fun and active class is just what you need to add some pizzazz to your testing preparation. Activities include Musical Chairs, Scavenger Hunt, Survivor, and more! Join Trish as she shares ways to engage students in learning as you implement the 17 GREAT EXPECTATIONS practices. You will leave with new activities to add to your testing “bag of tricks.” Participants are encouraged to bring their GREAT EXPECTATIONS Methodology Handbook to class. Areas of Focus: Critical Thinking, Differentiated Instruction, and Make & Take.

Nursery Rhymes to STEM: PK-6
Instructor: Lisa Whitwell

Involve students in science experiments, math discussion, art, and creative writing assignments through familiar nursery rhymes. Difficult tasks seem easy because they involve “nursery rhymes”. Invite students to look at these familiar sayings through a different lens.

The Vigorous and Rigorous Classroom: 2-6
Instructor: Chelsea Blackburn

Get students moving and talking academically in your everyday lessons! This course will provide you with a plethora of ideas that are adaptable to most any content area. An emphasis will be placed on vocabulary and cooperative learning structures. Your bum will never be numb and your brain will be on fire with activities to get your students learning!

Wiggles to Word Champs: PK-5
Instructor: Lisa Whitwell

Inspect familiar and unfamiliar books with the goal of building student’s vocabulary, writing skills and enjoyment of reading. Make and take cross-curricular activities to enhance students’ love of reading.
